December 29, 2014

To Whom it May Concern:

Subject: Nationwide Permit # 14 (Project below the Reporting Threshold)
Cass County (J4P2247B), 211st Street, Headwater Stream to East Branch South Grand River
Roadway improvements from east outer road to School Road in Peculiar (100% city funds)
Section 4 and 9, Township 45N, Range 32W

The U.S. Army Corps of Engineers issues Nationwide Permit #14 for activities required for construction, expansion, modification, or improvement of linear transportation crossings (e.g., highways, railways, trails, airport runways, and taxiways) in waters of the U.S. The Missouri Department of Transportation (MoDOT) and its contractors regularly construct bridge and roadway projects that have been evaluated by MoDOT staff and have been determined to have minimal impact to waters of the U.S. Nationwide Permit #14 projects with minimal impact can be defined as those projects involving discharges to waters of the U.S. (e.g., streams, lakes and ponds) causing losses no greater than 1/10-acre. No wetland impact may result if the project is to meet the minimal impact definition.

The roadway improvement work of partial new construction for safety improvements at a headwater stream of East Branch South Grand River meets the criteria as defined above, and no preconstruction notification is required by the Corps of Engineers. However, the permittee is still bound by and shall follow the Clean Water Act (CWA), Section 404 Nationwide Permit #14 conditions and the CWA, Section 404 Nationwide Permit General Conditions within the General Provisions. In addition, the permittee must also follow the seven conditions as specifies in the CWA, Section 401 Water Quality Conditions in the same document referenced above. Any temporary structures used to facilitate construction (e.g., temporary crossings and/or temporary work pads) will be constructed with clean rock fill. Stream crossings will be sufficiently culverted to allow for continuous and relatively unimpounded stream flow. The culverts will be placed to match the existing stream grade, which will allow for unimpeded aquatic life passage through the project area. Upon project completion, any temporary structure shall be completely removed and the area will be restored to its preconstruction conditions.

If you have any questions regarding the contents of this letter, please contact Ms. Valerie Hentges, Wetland Specialist, at (573) 526-4728.

Sincerely,

Buck Brooks
Wetland Coordinator
Missouri Department of Transportation

Our mission is to provide a world-class transportation experience that delights our customers and promotes a prosperous Missouri.
